Keller International, LLC  
Professional Salon Equipment Supply  
PO BOX 70 Hamlin, NY 14464  
Tel: 800-578-8772 Fax: 585-964-8093

## Item No: K2006 and K2006A

- 1) These heavy duty Hydraulic Barber Chairs have the same exact chair tops. The bases are slightly different.
- 2) Reclining Lever located on both sides:
  - no cables, all solid, adjustable rod mechanism
- 3) Reclining Back:
  - about 45 Degrees
  - power assisted with multi-adjustable air piston for infinite position settings.
- 4) Seat Dimensions:
  - 22" wide by 19" deep
- 5) Removeable Headrest:
  - with multi-adjustable snap-in-place detents.

This is a heavy duty, very wide barber chair with a thick seat cushion for comfort.

**K2006A Extra Heavy Duty Round Base**  
The extra heavy duty round base is 26.2" inches (660mm) in diameter. The pump capacity is 450 lbs and has a massive 1.575" inch (40mm) pump shaft for stability with a ~7" (190mm) stroke.

The K2006 stylish square base is molded fiberglass (20" by 22") and covers the steel hydraulic pump plate. The pump capacity is 400 lbs. and has a 1.185" (30mm) pump shaft with a stroke distance of approximately 5.65" (145mm).

Levers for operating the reclining mechanism are on both sides of the chair.

Keller Barber chairs have been designed for years of service. The extra heavy duty design of the K2006 & K2006A calls for the brackets and transition points to be fully welded to the solid (one piece) 1/4 inch thick steel seat. The foot plate is solid heavy cast iron with a rubber molded cover plate. The foot rest side bars are solid cast iron with chrome plating.

**Warranty:** Two year full warranty on the hydraulic pump, one year on the reclining mechanism.
