**Use the flexible hose (supplied) to connect the tilting bowl to the drain.**

**This is a Pibbs Model 0174 Flexible Drain Hose. It has been made (in Italy) to American standard fittings. Standard American screw collar on both ends - 1.5 inches in diameter - with a collapsed length of about 14 inches - can be extended to 30 inches (recommended to be used in the collapsed position). Two (2) gaskets included. Material: heavy-duty white polypropylene.**

**Water pressure (at the faucet) should never exceed 60 PSI. The optimal operating water pressure should be in the 30 PSI to 45-PSI range.**
